Solution	RTO	RPO	Recommendation
Public Cloud	Days or Weeks	Days or Weeks	Daily or Weekly backup to storage in another public cloud data center in a different region
		Hours	Hourly snapshots with daily incremental backups and weekly full backups to another public cloud data center in a different region
		Minutes	Continuous Data Protection to another public cloud data center in a different region
	Hours	Days or Weeks	Daily or Weekly backup to storage and capability of restarting services in another public cloud data center in a different region
		Hours	Hourly snapshots with daily incremental backups and weekly full backups and capability of restarting services in another public cloud data center in a different region
		Minutes	Continuous Data Protection and capability of restarting services in another public cloud data center in a different region
	Minutes	Days or Weeks	Daily or Weekly backup to storage and powered-on standby resources in another public cloud data center in a different region and/or presence in multiple public cloud 'availability zones'
		Hours	Hourly snapshots with daily incremental backups and weekly full backups and powered-on standby resources in another public cloud data center in a different region and/or presence in multiple public cloud 'availability zones'
		Minutes	Continuous Data Protection and powered-on standby resources in another public cloud data center in a different region and/or presence in multiple public cloud 'availability zones'
Private Cloud	Days or Weeks	Days or Weeks	Daily or Weekly backup to tape or inexpensive disk storage onsite
		Hours	Hourly snapshots with daily incremental backups and weekly full backups to tape or inexpensive disk storage onsite
		Minutes	Continuous Data Protection to inexpensive disk storage onsite
	Hours	Days or Weeks	Daily or Weekly backup to onsite disk or tape storage, daily or weekly remote storage replication, and ability to restart services in another data center in another region
		Hours	Hourly snapshots with daily incremental backups and weekly full backups to onsite disk storage, hourly remote storage replication, and ability to restart services in another data center in another region
		Minutes	Continuous Data Protection to disk storage onsite, asynchronous remote storage replication, and ability to restart services in another data center in another region
	Minutes	Days or Weeks	Daily or Weekly backup to disk storage, daily or weekly remote storage replication, and powered-on standby resources in another data center in a different region
		Hours	Hourly snapshots with daily incremental backups and weekly full backups, hourly remote storage replication, and powered-on standby resources in another data center in a different region
		Minutes	Continuous Data Protection to disk storage onsite, asynchronous remote storage replication,and powered-on standby resources in another data center in a different region
